Producto

Producto	Charcoal Briquette Press Machine 1-2 Tons Per Hour - MKBC02
Categoría	Briquette Machines
Subcategoría	Charcoal Presses
Precio	\$8,653.00

Descripción

The raw material for producing briquettes can come from small pieces of broken coal in storage, which breaks during transport, or is produced after it is used in the furnace. With this machine, coal and coal dust can be converted into coal briquettes (small and round, cube-shaped, etc.) to be recycled as fuel, for use in barbecues, or other uses of coal. Before manufacturing briquettes, the mixture must be made and moistened slightly, and the yield will be 100% coal dust/pieces/pieces of coal waste.

Especificaciones técnicas

Especificación	Valor
Potencia	5.5 kW
Capacidad	2 ton/hr
Dimensiones	1900*1560*1860 mm
Peso	900 kg
Humedad	30%
